

Acid - Base Chemistry

Definitions

Definitions

- **Acids** are chemicals that when dissolved in water, raise the **concentration** of hydrogen ions (H^+)... increase $[H^+]$

Definitions

- **Acids** are chemicals that when dissolved in water, raise the **concentration** of hydrogen ions (H^+)... increase $[H^+]$
- **Bases** are chemicals that when dissolved in H_2O , decrease $[H^+]$ and increase $[OH^-]$

Definitions

- **Acids** are chemicals that when dissolved in water, raise the **concentration** of hydrogen ions (H^+)... increase $[H^+]$
- **Bases** are chemicals that when dissolved in H_2O , decrease $[H^+]$ and increase $[OH^-]$
- **Indicators** show you if something is an acid or a base, and often how strong it is

pH

pH

- A logarithmic scale that measures $[H^+]$ The scale goes from 0 to 14

pH

- A logarithmic scale that measures $[H^+]$ The scale goes from 0 to 14
- 0- almost 7 are acids, $7=H_2O$, almost 7-14 are bases

pH

- A logarithmic scale that measures $[H^+]$ The scale goes from 0 to 14
- 0- almost 7 are acids, $7=H_2O$, almost 7-14 are bases
